Educational Philosophy

Student Affairs at Illinois provides opportunities for students to integrate and enhance their learning through co-curricular experiences and on-campus employment. We provide opportunities that reinforce classroom concepts while teaching other vital career readiness skills such as communication, self-management, collaboration, emotional intelligence, intercultural competence, leadership, and many more. Student Affairs at Illinois challenges students to build resiliency, think critically, and solve problems creatively. As educators, we provide advocacy and resources to meet student needs as they transition into engaged global citizens and leaders. We will continue to innovate to provide transformative life experiences that promote life-long learning and student development.
